DR. L. MICHAEL HALL

CREATOR OF NEURO-SEMANTICS

Michael has long been recognized as a visionary leader in the fields of NLP and Neuro-Semantics. Upon learning NLP (1986), he first applied it as a psychotherapist, then as a modeler of human expertise. From working with Bandler, he saw the downside of incongruency, he and Bob Bodenhamer co-founded Neuro-Semantics (1996). While his doctorate was in Cognitive Psychology, after launching Meta-Coaching with Michelle Duval (2002-2007), he focused his attention on Self-Actualization Psychology which is today the theme of Neuro-Semantics— unleashing potentials in individuals and groups.

Upon researching and modeling resilience and discovering the power of self-reflexivity, Dr. Hall developed the Meta-States Model (1994) thereby launching Neuro-Semantics. The inherent creativity in Meta-States later led to the Self-Actualization Quadrants (2004), the new Human Potential Movement (2005), Axes of Change, Crucible, Spiral of Trust, and many other models. Believing in collaboration, Michael and Frank Pucelik co-founded the NLP Leadership Summit (2011) bringing NLP Leaders together worldwide. A prolific writer, Michael has written more than 70 books (with another 40 serial books) and serves as the academic researcher and director in Neuro-Semantics.
